

6. Demonstrate lazy collection in Hibernate.

Code:

Ecommerce.com:

```
package com.ecommerce;

public class Color {
    private long COLORID;
    private String name;

    public Color() {
    }

    public Color(String name) {
        this.COLORID = 0;
        this.name = name;
    }

    public long getCOLORID() {return this.COLORID; }
    public String getName() { return this.name;}
    public void setCOLORID(long id) { this.COLORID = id;}
    public void setName(String name) { this.name = name;}
}
```

E product.com:

```
package com.ecommerce;
import java.math.BigDecimal;
import java.util.Collection;
import java.util.Date;
import java.util.List;
import java.util.Set;
import java.util.Map;

public class EProduct {
    private long ID;
    private String name;
    private BigDecimal price;
    private Date dateAdded;
    private List<Color> colors;
    private Collection<ScreenSizes> screenSizes;
    private Set<OS> os;
    private Set<Finance>finance;

    public EProduct() {
    }

    public long getID() {return this.ID; }
    public String getName() { return this.name;}
    public BigDecimal getPrice() { return this.price;}
    public Date getDateAdded() { return this.dateAdded;}
    public List<Color> getColors() { return this.colors;}
}
```

```

        public Collection<ScreenSizes> getScreensizes() { return
this.screenSizes;}
        public Set<OS> getOs() { return this.os;}
        public Set<Finance> getFinance() { return this.finance;}

        public void setID(long id) { this.ID = id;}
        public void setName(String name) { this.name = name;}
        public void setPrice(BigDecimal price) { this.price = price;}
        public void setDateAdded(Date date) { this.dateAdded = date;}
        public void setColors(List<Color> colors) { this.colors = colors;}
        public void setScreensizes(Collection<ScreenSizes> sizes) {
this.screenSizes = sizes;}
        public void setOs(Set<OS> os) { this.os = os;}
        public void setFinance(Set<Finance> finance) { this.finance = finance;}

    }

```

Finance.com:

```

package com.ecommerce;

public class Finance {
    private long FINANCEID;
    private String name;
    private String ftype;

    public Finance() {

    }
    public Finance(String name, String ftype) {
        this.FINANCEID = 0;
        this.name = name;
        this.ftype = ftype;
    }

    public long getFINANCEID() {return this.FINANCEID; }
    public String getName() { return this.name;}
    public String getFtype() { return this.ftype;}
    public void setFINANCEID(long id) { this.FINANCEID = id;}
    public void setName(String name) { this.name = name;}
    public void setFtype(String ftype) { this.ftype=_ftype;}

}

```

Hibernateutil:

```

package com.ecommerce;
import org.hibernate.SessionFactory;
import org.hibernate.boot.Metadata;
import org.hibernate.boot.MetadataSources;
import org.hibernate.boot.registry.StandardServiceRegistry;
import org.hibernate.boot.registry.StandardServiceRegistryBuilder;

public class HibernateUtil {
    private static final SessionFactory sessionFactory;

```

```

        static {
            try {
                StandardServiceRegistry standardRegistry = new
                StandardServiceRegistryBuilder()

                .configure("hibernate.cfg.xml").build();
                Metadata metaData = new
                MetadataSources(standardRegistry).getMetadataBuilder().build();
                SessionFactory =
                metaData.getSessionFactoryBuilder().build();
            } catch (Throwable th) {
                throw new ExceptionInInitializerError(th);
            }
        }

        public static SessionFactory getSessionFactory() {
            return sessionFactory;
        }
    }
}

```

Os.com:

```

package com.ecommerce;

public class OS {
    private long OSID;
    private String name;

    public OS() {

    }

    public OS(String name) {
        this.OSID = 0;
        this.name = name;
    }

    public long getOSID() {return this.OSID; }
    public String getName() { return this.name; }
    public void setOSID(long id) { this.OSID = id; }
    public void setName(String name) { this.name=_name; }

}

```

Productdetails.com:

```

import java.io.IOException;
import java.io.PrintWriter;

import javax.servlet.ServletConfig;
import javax.servlet.ServletException;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;

```

```
